Project Title: Mentee Mobile & Web Application Development proposal

1. Executive Summary

E Software Solutions (ESS) is pleased to submit this Commercial Proposal in response to the Project Requirement Document (PRD) shared by the Client. The proposal outlines the commercial structure, professional services, resource plan and associated costs for the design, development, deployment and support of a comprehensive Mentor–Mentee Digital Platform across Web, Android and iOS channels.

This proposal has been prepared to meet enterprise-grade requirements while ensuring scalability, security, compliance and long-term maintainability.

2. Project Understanding

Based on the PRD received, the system is envisioned as an institutional-grade mentorship platform enabling:

- Role-based access for Students (Mentees), Faculty/Experts (Mentors), Program Coordinators, Admin and Super Admin
- SSO-enabled authentication
- Mentor–Mentee matching (manual + automated algorithms)
- Session scheduling with video integration
- Structured communication, task management and progress tracking
- Resource sharing and session documentation
- Reporting and analytics at program, semester and institutional levels
- Mobile applications (Android & iOS)
- Administrative controls and end-to-end user lifecycle management

ESS proposes a robust, scalable architecture aligned with industry best practices.

3. Proposed Engagement Model

ESS will follow a fixed-cost, milestone-based delivery model with fully dedicated resources assigned for the duration of the engagement. The project will be executed using Agile methodology with fortnightly sprints and milestone checkpoints.

Delivery will include:

- Requirement validation & solution blueprinting
- UI/UX design aligned with academic & enterprise standards

Software Solution

- Backend architecture, APIs and data model design
- Web, Android, and iOS application development
- Admin console and analytics module
- DevOps setup, cloud configuration and CI/CD pipelines
- UAT, security review and deployment across environments
- Documentation, knowledge transfer and post-go-live support

4. Project Duration

The estimated project duration is 16 weeks (4 months) from the date of project initiation and approval.

5. Project Team Structure

A dedicated team comprising the following skilled professionals will be deployed:

Role	**Count**	**Responsibility**
Project Manager	1	Delivery governance, client communication, timelines
Technical Architect	1	Solution design, cloud architecture, security
Senior Backend Engineer	1	Core backend services, integrations
Backend Engineers	2	Feature development, data layers
Frontend (Web) Developers	2	Web UI, dashboards, admin panel
Mobile Developers (Android/iOS)	2	Mobile app development (cross-platform/native)

Software Solution

UI/UX Designer	1	Wireframes, prototypes, visual design
QA Engineer	1	Manual & automated testing
DevOps Engineer	1	CI/CD, cloud setup, monitoring

Total Team Size: 11 Resources

6. Commercials

Total Project Cost: ₹ 40,00,000
(Forty Lakhs Indian Rupees Only)

This includes:

- End-to-end development
- Testing & performance validation
- Deployment support
- Documentation & KT
- Project management & governance

Software Solution

7. Payment Schedule

To ensure smooth execution, ESS proposes the following milestone-based payment structure:

Milestone	**Description**	**%**	**Amount**
M1 – Project Initiation & Team Mobilization	Advance + Resource Allocation	30%	₹ 12,00,000
M2 – Design Sign-off	Wireframes + UI/UX design completion	10%	₹ 4,00,000
M3 – Architecture & Backend Foundations	DB schema, auth, core services	10%	₹ 4,00,000
M4 – Web Platform Development	Core modules + dashboard	15%	₹ 6,00,000

M5 – Mobile App Development	Android + iOS core modules	15%	₹ 6,00,000
M6 – Admin Panel + Reporting	Admin console + analytics	10%	₹ 4,00,000
M7 – Integrations + QA/UAT	SSO, calendar, notifications	5%	₹ 2,00,000
M8 – Final Deployment & Handover	Web + Play Store + App Store deployment	5%	₹ 2,00,000

Total: ₹ 40,00,000

8. Cloud Infrastructure & External Costs

The following costs are not included in the development cost and will be borne directly by the client. ESS will support setup at no extra service charge.

8.1 Cloud Infrastructure (Annual Estimate)

Service	**Estimated Annual Cost**
Compute Instances (AWS/Azure)	₹ 1,20,000 – ₹ 2,40,000
Database (MongoDB Atlas/RDS)	₹ 60,000 – ₹ 1,20,000
Load Balancer	₹ 40,000 – ₹ 60,000
Storage & Backups	₹ 15,000 – ₹ 30,000
CDN	₹ 24,000 – ₹ 48,000
Monitoring/Logs	₹ 15,000 – ₹ 30,000

Software Solution

8.2 Third-Party Services

Service	**Description**	**Cost**
Apple Developer Program	Mandatory for iOS	USD 99/year
Google Play Console	One-time registration fee	USD 25
SMTP/Email Provider	SendGrid/Mailgun	As per consumption

SMS Gateway	OTP & alerts	As per consumption
Zoom/Google Integration	API usage charges	As per consumption

9. Deliverables

ESS will deliver:

- Web Application (Mentee/Mentor/Coordinator Views)
- Android & iOS Mobile Applications
- Admin Dashboard
- Secure backend & APIs
- Databases, models, and service layers
- CI/CD pipelines & deployment automation
- Documentation:
    - Technical documentation
    - API documentation
    - User manuals
    - Deployment guide
- UAT plan & test reports
- 30-day post-production support

Software Solution

10. Terms & Conditions

- Quote validity: **15 days**
- All third-party and cloud costs are billed at actuals
- Any enhancement or new feature beyond PRD scope will require a formal Change Request
- All intellectual property of the developed platform will be transferred to the client upon full payment
